Forecast for Wednesday 18 Aug 2021

Weather: A dull, grey and cloudy day for many with occasional light rain or drizzle across the north and west of the Beacons. However there may be some drier and brighter spells in sheltered southern and eastern parts during the afternoon and early evening. It should become more widely dry through the evening with some cloud breaks developing. Lighter winds than on Tuesday.

Chance of cloud free mountain/hill tops above 600m: Generally less than 20% all day in the north and west, increasing to 70% at times during the afternoon in the south and east.

Visibility: Generally very poor on the higher routes with cloud bases around 400m throughout the day across western and northern areas, but occasionally good visibility across the south and east when the cloud may lift to 800m at times in the afternoon, only covering the highest summits and allowing for some brighter spells

Forecast for Thursday 19 Aug 2021

Weather: Dry during the early hours with some clear spells and dry at first on Thursday morning. Clouding over through the morning with showery rain spreading from the west by midday. Cloud breaking to sunny spells, but also the odd heavier shower possible in the afternoon before slowly turning drier in the evening.

Maximum wind: West to southwesterly 15-20mph gust 25mph

Chance of cloud free mountain/hill tops above 600m: 20% at first in the early hours improving to 70% towards dawn then deteriorating to 40% or less mid-morning onwards. Improving to 70% in the evening as it turns drier.

Visibility: Poor at first with extensive cloud on slopes above 400m. Becoming generally good around dawn as cloud lifts and breaks to small amounts near 700m. Soon deteriorating again to poor as showery rain arrives with areas of cloud developing on many slopes above 400m. Cloud lifting and breaking to small amounts near 800m late in the day.

Temperature: **Valleys:** Plus 12 Celsius becoming Plus 18 Celsius.
At 600m: Plus 12 Celsius.
Freezing level: Above the summits.
